

A man in a dark suit is seen from behind, holding a baton in his right hand and gesturing with his left hand. He is standing against a dramatic, fiery sky with large, billowing clouds in shades of orange, yellow, and dark blue. The overall mood is one of intense energy and control.

For people who demand heaven
and earth from their reporting system

Compleo Supervisor

*Your total AS/400 Report
Management System.*

All spool file reports may now be routed automatically from the AS/400 to the correct person and in the correct format. Compleo Supervisor works hand in hand with Symtrax's internationally acclaimed report downloading and archiving product - Compleo Explorer, helping to ease the MIS Department's workload and to bring business critical data to users quickly, efficiently and with full security.

More and more users are demanding AS/400 report data in a PC format. Without Compleo, that means more MIS Department time is spent on repetitive projects, time that could be spent on other more critical tasks. Symtrax offers a ready to use solution that will streamline your report distribution process, getting the right information to the right person at the right time.

The Compleo family of products: Explorer, Supervisor and Formulator, allows users to work wisely, saving time and resources.

Why Use Compleo Supervisor?

Instead of manually searching for reports, have them automatically routed to users.

Archive reports automatically to PC's or PC media, such as CD ROMs and Network Servers.

Reduce user access to the AS/400 by sending reports in batch process.

Now that all this can be done from the comfort of your PC, supervising AS/400 tasks has never been so easy!

For people who demand heaven and earth from their reporting system

Streamline your report distribution process with Compleo Supervisor

- Automatically send formatted reports to users in Excel, Lotus 1-2-3, Word, e-mail, PDF, HTML and more
- Automate all Compleo Explorer functions – Import, Hold, Release, Copy, Send...
- Automatically archive reports to other AS/400's, PC's and PC media
- Track errors and receipts through Supervisor's Log Viewer
- Indicate how spool files should be sent to users by a variety of conditions

A Complete AS/400 Report Management System

In today's business world, AS/400 managers are looking for ways to deliver AS/400 information more quickly to PC users, while saving costs at the same time. Today's mix and match of "tools" leave users frustrated and banging on MIS' door for timely information. That is why Symtrax has developed a family of reporting products that make up a total AS/400 Report Management System.

A Critically Acclaimed Solution

Compleo Supervisor works hand in hand with what the industry experts have deemed a top of the line tool, Compleo Explorer. Don Rima, product "Spotlight" editor for AS/400 Magazine, an IBM publication, said, "If you can open a spreadsheet in Excel and count to 10, you can use Compleo....I was impressed.

Here I had a package that would take my report data and convert and import it to my PC...for users with this need, this package seems to do the trick – and do so nicely." Compleo Supervisor removes the need for users to connect interactively to the AS/400. An administrator, using an easy PC interface, can set up send rules according to a variety of criteria. When it is not actively routing a spool file, Compleo Supervisor does not take up any CPU.

Intelligent Scheduling

An administrator may schedule the day and time when the outqueue is to be supervised and then define "rules" to start the specified scenario based on a variety of criteria. Here are some of the conditions:

- Spool Name
- User Name
- Job Name
- Number of Pages
- Contents of spool file
- Form Type

Combinations of rules can be used to precisely define which spool files are to be sent, copied, released...

Get Information To Users In The Correct Format

When a spool file appears in an outqueue matching the defined criteria, Supervisor runs a Compleo mask (idf format), which strips and parses the report according to user needs. The report may be downloaded into Excel, Word, Lotus, etc., then either saved directly to the user's PC or sent to the

user by e-mail. This process eliminates the need for an MIS employee to spend time downloading and formatting spool reports.

It also eliminates unneeded user access to AS/400 resources and sensitive information. Discover the benefits of Symtrax's world-renowned Compleo Explorer application: eliminates the need to rekey printouts into Excel and other applications and can limit report paper costs.

Archive Reports While You Sleep

With Supervisor you can automate all Compleo archiving functions. Schedule reports to be archived to designated media whenever they appear, according to the criteria you select. Reports are archived in Compleo's .SPL format, which is compressed and may be converted at any time to Excel, Word or other PC documents. Archived spool files may also be sent back to the AS/400 for printing.

Secure Your System

As with Compleo Explorer, Compleo Supervisor boasts an airtight permission security system. Administrators may indicate which users are allowed what rights, regarding defining conditions, monitoring outqueues, etc.

Logging – Added Security

Adding to the power and reliability of Compleo Supervisor is a WindowsNT-like logging interface. Logs may be viewed by their type – error, warning, success, informational and by their category – communication, security, input/output etc. Logs may also be e-mailed to an administrator or appear in a message queue on the AS/400.

Painless Installation

As with all Symtrax products, Compleo Supervisor is installed on the PC and AS/400 in just minutes. AS/400 libraries are uploaded using any connection type from the PC to the AS/400.

Compleo Supervisor is available for Windows NT/98/95. Connections supported are TCP/IP, APPC, SNA Server etc.
