

# Compleo

Click and you shall receive.

Now you can access your AS/400 spool files from the PC with ease, speed and accuracy.

Gone are the days of rekeying reports into PC applications. With just the click of a button, download your reports into the application of your choice.

Why settle for a mix and match of spool file download and formatting solutions when you can let one application do it all?

#### Why Use Compleo?

Be more productive: eliminate rekeying reports into PC applications.

Stop printing reports from the AS/400 and save money.

Distribute critical data via groupware technologies.

Archive spool files with ease.

# Use Compleo to download spool files from the AS/400 to PC Applications

Perform all of these functions with one application and interface

- View your AS/400 spool files without opening a terminal session
- Preview spool file contents before downloading to the PC
- Transfer reports to PC applications with point-and-click ease
- Create "masks" or models to facilitate downloading of reports into PC applications
- Locate and copy only the data you need
- Strip unneeded information such as headers and footers
- Avoid errors and time lost by re-keying data into PC applications

Distribute your data throughout the company

- Send spool files to internet/intranet servers in HTML format
- Send spool files via e-mail and FAX

Download with ease

If your company is like most, chances are you have to perform many laborious tasks in order to transfer spool files from the AS/400 to the PC. Why waste time with file transfer, different file formats and homespun macros?

Try Compleo and you'll see why so many companies are working faster and more efficiently.

Compleo provides the user with one easy-to-use PC interface to the AS/400, similar to that of Windows Explorer. Users may, according to profile, see a list of spool files from multiple AS/400s and outqueues. Downloading spool files to PC applications is done by simply pointing and clicking.

Increase productivity and economize

Avoid wasting time and errors associated with re-keying information from report printouts to PC applications. Double your productivity and spend time working on other, more important activities. Save money by eliminating the need for printing reports.

Parse like a pro

Before, downloading reports into spreadsheets and word processing applications was a lot of work. Now you can parse data before you download and get the result you want.

Using the ImportWizard, create masks or models to facilitate parsing of spool data into PC applications. These masks can be saved and used over and over. Split report data into spreadsheet columns. Strip out headers, footers and other extraneous information. Also, indicate which sections of spool files should appear in the final report using key words.

Distribute information

With Compleo, make report information available over the Internet or an Intranet. Easily convert spool files into HTML (viewable with a Web browser). Specify web links to appear in reports converted to HTML. Send reports directly from the AS/400 to PC e-mail and FAX applications. Put reports on network servers to allow access to the entire organization.

Store and restore

Now you don't need to invest in separate, report archiving tools. Take advantage of Compleo's extended archiving facilities. Compleo's simple interface lets you drag and drop your reports from the AS/400 to:

- Other AS/400s
  - Floppy disks, PCs and servers
  - CD-ROM and optical media devices
- Take previously archived spool files and with a click of the mouse restore them to the AS/400

Painless installation

Compleo can be installed on the PC and the AS/400 in less than five minutes. Using our unique installation process, all AS/400 libraries are restored from the PC to the AS/400. No cartridges are needed. Compleo takes up little space and requires only 1 MB on the AS/400 and 3 MB on the PC. That's all.

Available for Windows 95/98/NT. Connections supported are: APPC, TCP/IP, SNA server, etc.
